

BOARD TO BOARD CONNECTORS

STANDARD AND CUSTOM SOLUTIONS BY PRECI-DIP

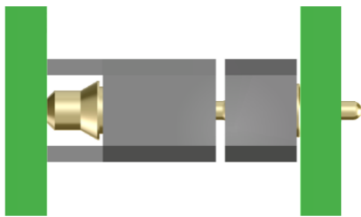

preci-dip

HIGH PRECISION BOARD TO BOARD CONNECTORS

PRECI-DIP is a world leader in designing and manufacturing screw machined, high precision and high quality contacts and connectors. We offer over 25.000 references in our catalogue, with many kinds of terminations and technologies. PRECI-DIP connectors can be mated together to make efficient and highly reliable board to board connections.

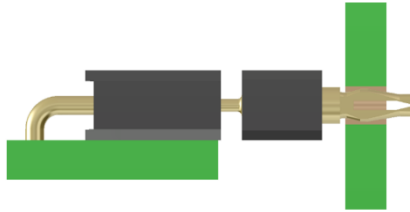

Different configurations are possible to meet your requirements:

Mezzanine

350-80-102-00-019101
matted with
314-83-102-01-899101

Backplane

356-80-102-00-014101
matted with
399-83-102-10-003101

Daisy-Chain

8FM-87-0002-02-278
matted with
8MM-11-0002-02-279

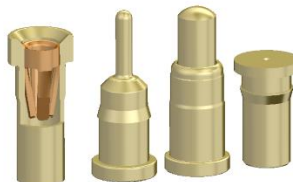

CUSTOMIZABLE SOLUTIONS

PRECI-DIP's proprietary unique production system, from raw material to finished product, is entirely in-house built, including all our tooling, high speed screw machines, and automatic assembly machines. This gives our team of engineers the ability to design and build custom products to fulfill the demanding needs of our customers.

Different types of termination

Different contact families

Different insulator configurations

MANY APPLICATIONS OF WIRE TO BOARD CONNECTORS

CONSUMER

Spring loaded connector with Patented PRECI-DIP Multi-finger Clip Technology for a backplane connection

AUTOMOTIVE

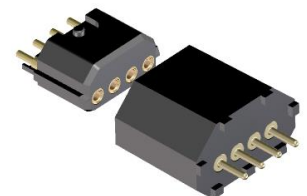

10-way customized Board to Board connector in EV inverter for a mezzanine connection

MEDICAL

Double sided spring pin connector in artificial respirator for solderless connection

INDUSTRIAL

Heavy duty 4-way connectors in industrial monitoring devices for a mezzanine connection
