OUR LINE OF ADVANCED
CONNECTORS
DEVELOPED FOR THE
CONSUMER
ELECTRONICS MARKET

swiss world connects

**Custom-Designed and
Standard Solutions.
For Every Need.
In Every Market. Worldwide.**

**Our line of advanced connectors developed for the
consumer electronics market**

PRECI-DIP is a solutions provider in the demanding consumer electronics market, where flexibility, speed, cost, and miniaturization are key. Our vertically integrated processes, coupled with our worldwide presence (Europe, USA and China) provide an effective means of addressing these challenges. Applications using our products are numerous: camera lenses, ear buds, VR glasses, payment terminals, home automation, tablets, remote controls, drones, and many more.

**Making the world dance with spring-loaded contacts
custom designed for earbuds.**

Gold-plated, spring-loaded contact used in the charger case for earbuds, ensuring high reliability for multiple charging connections, as well as high resistance to corrosion.

**Full flight and fun control with spring-loaded
contacts for drone innovations.**

Eight-way, 2.5-mm-high/low profile connector, ensuring data capture and transfer from a drone camera to a memory module

Custom Design Is Creativity Realized.

Our design teams have vast experience in material sciences, electrical engineering, process engineering, and machine building. We apply this know-how to many diverse applications and industries, utilizing an agile and sustainable approach. We use state-of-the-art tools for FEA, mold-flow analysis, and product performance simulation. These tools provide for rapid and reliable development, problem solving, validation, and, ultimately, premier solution fulfillment.
