Environmental policy

Striking a balance between environmental protection and economic considerations is proving difficult but essential in an increasingly competitive and demanding environment. Preci-Dip has chosen to set itself apart from the competition by committing to an environmental protection and continuous improvement approach through the implementation of an environmental management system based on ISO 14001 certification.

As legislation is tightened, companies must demonstrate transparency, and their responsibilities for safeguarding ecosystems and biodiversity have evolved. Once again, Preci-Dip has demonstrated its commitment to this approach by controlling the impact of its activities on the environment and meeting its compliance obligations.

Through this policy, we are committed to:

- ❖ To consider the environmental impact of all our activities and decisions.
- ❖ To make all our employees, suppliers, and subcontractors aware of the need to protect the environment and to encourage an eco-responsible attitude.
- ❖ Strive to continually optimise the use of our energy resources and reduce our carbon footprint.
- ❖ To establish coherent environmental objectives, targets, and performance criteria. To monitor and verify them on an ongoing basis.

The prevention of pollution, the rational use of resources and the reduction of waste are all part of our company's roadmap.

Every day, by complying with sorting instructions, reducing our consumption, raising awareness, and proposing alternatives, we are helping to protect our environment.

I invite every employee to take ownership of this policy and demonstrate, through their actions, commitment, and proposals, that they are a key player in our approach.

Delémont, January 3rd, 2024
